# ABOUT GOODRICH

---

Goodrich Global is Asia's leading supplier of wallcoverings, fabrics, carpets and flooring materials.

We are involved in virtually every aspect of the soft furnishing as well as the flooring industry, from production, sourcing, and distributing to marketing, branding and retailing. Our investment in branding creates value in our market developments achieving customer satisfaction.

Goodrich is currently located in Singapore, China, Hong Kong (China), India, Indonesia, Malaysia, Myanmar, Philippines, Thailand, United Arab Emirates & Vietnam.

With the largest service and installation team in the region, we work closely with the design firms and have particular expertise in providing wallcoverings, soft furnishings and flooring products for the following type of facilities.

- Hospitality Industry
- Health Care Facilities
- Commercial and Retail Buildings
- Educational Institutions
- Places of Interest
- Religious Buildings
- Residential Projects

Our Product Range is diverse and creative with an unlimited choice of colours, patterns and textures.

# INTRODUCTION CARPET TILE

---

## What is Carpet Tile?

Carpet tiles, also known as modular carpet or carpet squares, are a modern and stylish alternative to standard carpet rolls. Often used in commercial settings, such as in offices and schools, they are becoming more and more popular in residential and hospitality spaces.

Common fiber materials are nylon and polypropylene. They also come in different sizes such as 50x50cm, 60x60cm and plank format 25x100cm.

Carpet tile backing material options include: PVC, cushion and bitumen. Quality backing systems are important because they provide dimensional stability to the carpet tile.

Carpet tiles come with a range of benefits that include:  
Simple and fast installation than standard roll carpet.  
Easier to clean and maintain. Individual carpet tiles can be removed for cleaning, and replaced when dry. If one area of the floor becomes damaged, the tile can be replaced without replacing the entire floor.  
Carpet tiles allow for freedom with design, allowing you to give more depth and texture to a room.  
You can install carpet tiles right over many floor types, including wood and tile. This way, you can quickly add a new look without the renovation work required by most flooring.

Our extensive range of hard-wearing carpet tiles are perfect for all types of high traffic environments. Choose from a diverse selection of patterns and colours or customise one to complement a particular design theme.

# INTRODUCTION BROADLOOM

---

### What is Broadloom Carpet?

Broadloom carpet, as the name implies, is tufted or woven on a very wide loom that is installed wall-to-wall. They are usually 3.66m wide, but can also be 4.00m or even 4.57m.

There is a wide range of broadloom carpet styles – from rich traditional colours and patterns to expressive contemporary designs – provides considerable creative possibilities for both commercial and residential applications.

The advantages of using broadloom carpet include:

- Broadloom carpet when used with underlay can create a plusher feel and better foot comfort compared to carpet tile.
- Significantly reduce impact and reverberation noise, creating a quieter environment
- Available in various design options and patterns, colours, even mosaics — nearly limitless aesthetic possibilities.
- Broadloom and Axminster carpet are exceptionally durable. They hold up extremely well under foot traffic and even heavy loads. This makes them ideal for public spaces that get a lot of use.

Type	Axminster Carpet					
Width	3.66 or 4.00m					
Construction W	oven					
Face Yarn	80% New Zealand & British Wool, 20% Nylon 66					
Yarn Ply & Count 2	Ply - 740/2 TEX					
Pitch	7	7	7	7	7	7
Rows	7	8	9	10	11	12
Pile Weight	34oz/sy	38oz/sy	42oz/sy	46oz/sy	50oz/sy	54oz/sy
Primary Backing	WEFT: JUTE OR POLYPROPYLENE ; WARP: POLYESTER /COTTON					

# INTRODUCTION RUGS

---

## **What is Rug?**

A rug is a piece of thick floor covering material that you put on a floor.

It is like a carpet but covers a smaller area, usually as decorative and accent pieces you can place in living halls, dining rooms, office reception areas and hotel lobbies.

Rugs can be made in different materials from wool, nylon, silk, bamboo or a blend of these materials.

They can be made in different surface construction (cut pile, loop pile, tip shear and option of carving) to create interesting textures.

Explore the potential of textures and colours to create a luxurious experience.

Beside standard design collections, we also offer bespoke designs. Unleash the creativity which can produce different thematic styles – tribal for exotic vibe with leafy motifs, botanical prints and patterns to create springtime look or resort look using natural earth hues.

# CUSTOM CARPETS

---

## CUSTOM ORDER PROCESS

### ▼ MEETING

- Understand the overall design concept, specification, budget, quantity and delivery time.
- Selection of colour poms.
- If design is provided, please ensure there will be no copyright issues.

### ▼ DESIGN PROPOSAL

- Prepare computer graphic artwork which take about 3 to 7 working days.
- Note computer graphic artwork is for image reference only, actual colour refer to colour poms.

### ▼ SUBMISSION OF STRIKE OFF

- Upon confirmation of computer graphic artwork, will proceed for strike off production.
- Delivery time for strike off is 2 weeks.
- Note strike off represent colour and design only. It does not represent the real actual quality/density.

### ▼ CONFIRMATION AND APPROVAL OF STRIKE OFF

- Confirm and approve the strike off to proceed for production.

### ▼ PLACE ORDER

- Place order to start production of the carpet.

### ▼ DELIVERY TIME

- Production time 6 to 8 weeks depending on quantity, number of colours and subject to production schedule.
- Sea shipment vary depending on location.
- Please contact sales for more information.

# CARE & MAINTENANCE

---

## **TIPS ON HOW TO TAKE CARE OF YOUR CARPETS**

Regular and thorough vacuuming once or twice a week (more often in heavy traffic areas) to remove soil and dirt particles.

When you see spots or stains, treat them immediately.

- a) Blot up liquids with paper towel or absorbent cloth. Remove solids with the end of a knife or spoon.
- b) Immediately wet a clean cotton towel with warm water, wring it out and place over the stain. When the towel is saturated, replace it with a fresh one.
- c) Always work from the outer edge towards the centre to prevent spreading.
- d) DO NOT use household cleaners such as soft soap, neutral soap, ammonia solution, turpentine, benzine or spot removal agents which are only recommended for textiles.

Deep cleaning is required periodically to remove the deepest soil.

Use a reputable company and check references to have your carpet professionally cleaned.

One preventive measure is to place absorbent mats at entrances to your home; change or wash these when they have become dirty.

Take note that acids and chemicals can cause discolouration.
